Brian Klaster, CSCO

Klaus Nørgaard Madsen, CTO

Changes in Global Management at Resolux Group to support our Growth

As Resolux Group continues to grow and expand into new regions, we are restructuring our Global Management team to better align with our evolving business needs. To support this growth, the role of Chief Operations Officer (COO) will be divided into two specialized positions:

Chief Technology Officer (CTO) and Chief Supply Chain Officer (CSCO).

We are pleased to announce that Klaus N. Madsen, who has been a valued member of Resolux for 12 years, will transition into the CTO role, where he will oversee our global technology strategy. The new CSCO role, responsible for leading our global supply chain strategy, will be filled by an external candidate, bringing fresh insights and expertise to our team.

- These changes will enable us to sharpen our strategic focus and continue delivering exceptional value to our clients worldwide. In close collaboration the CSCO and CTO must align with Sales to ensure that we meet and exceed customers' expectations.

As CTO, Klaus N. Madsen will oversee Global QHSE, Project Management, and Business Projects & Processes. In addition, he will play a pivotal role in managing technical projects with our customers and will collaborate closely with the Global Sales Organization.

At Resolux, global collaboration and teamwork are core priorities. We seek individuals who embody our values and align with the principles of “A Global Resolux Employee.” Working within a matrix organization demands strong teamwork, the ability to view daily operations from multiple perspectives, and a commitment to aligning on priorities. By respecting each other’s contributions, we drive our shared success on a global scale.

It is our pleasure to present the new Chief Supply Chain Officer (CSCO) Brian Klaster.

Brian joins us after an impressive 11-year tenure at Danfoss, where he held several key roles within procurement, supply chain and operations, most recently serving as VP, CEO of the eSteering Business Unit within Danfoss Power Solutions in Nordborg. Before his time at Danfoss, Brian gained valuable experience at Vestas, where he was responsible for tower internals and worked closely with Resolux.

“We are excited to welcome Brian on board, and with Klaus in his new role, we look forward to working as a strengthened global management team ready to simplify the supply chain of our customers”.

- Mads-Ole Astrupgaard, CEO

Please join us in giving Brian a warm welcome to the Resolux team!
