GEXPRO SERVICES, RESOLUX GROUP & FRONTIER TECHNOLOGIES are Global Supply Chain Services Suppliers to the Wind Industry. We support Original Equipment Manufacturers with their ongoing production line material requirements, engineering and services. We have helped numerous companies streamline their Global quality, sourcing, new product introduction, procurement, inventory logistics management and point of use distribution processes, allowing them to focus on strategic activities and positively impact their competitiveness and profitability.

BENEFITS OFFERED

BROAD PRODUCT OFFERING. Including: electrical, fasteners/hardware, machine/fab parts, valves/instrumentation, mechanical and more.

HIGHLY SKILLED TEAMS. Strong industry experts committed to helping improve your business operations. Our sourcing specialists, supplier quality engineers, design engineers, implementation team, and program managers work with you to ensure on time material delivery and seamless production operations.

VALUE ENGINEERING. Our engineers, sourcing specialists, and supplier quality engineers work with your team to promote product consolidation, material standardization, new product introductions, and unlock crucial cost savings in product application.

TECHNOLOGY. Our operations are fully digitized and utilize the best IT solutions across all of our business functions.

CUSTOMIZED KITTING AND INVENTORY MANAGEMENT PROGRAMS. Kitting solutions and on-site Kanban programs are designed to reduce labor and transportation costs, improve supply chain efficiencies and drive inventory optimization.

GLOBAL REACH. With our global infrastructure and quality teams, we can support your global operations. Our offering is customized to address your specific global and local needs.

REDUCED COST OF OWNERSHIP. With decreased purchasing, accounting, receiving, inspection and material handling for our customers, they recognize the material cost and operational productivity associated with the products we specialize in.

STRONG QUALITY MANAGEMENT PLATFORM. Our branches are supported by a mature Quality Management System certified to ISO9001:2015 and AS9100D. Digitized processes and procedures minimize escapes and maximize product and process quality. Supplier approvals, supplier audits, part qualifications, supplier management metrics, and our program-dedicated inspectors ensure you are getting the right product at the right time. Dedicated customer quality engineers provide your team critical performance reports, metrics and tools to ensure performance is monitored and controlled at all times.

A SUSTAINABLE PARTNERSHIP. Wind, Solar, EVs incl. chargers and PtX etc are all strategic focus areas in our Renewable Energy Vertical.

PRODUCT LISTING

NACELLE

Fabricated and Machined Parts
Large Diameter Structural Nuts and Bolts
Cable Harnesses
Hardware/Fasteners
Power & Control Cable
Grounding Straps/Cable
Slip Ring Cable Assembly
External Rails and Hand Rails
Crane Rail Assembly
Door Latches & Hardware
Instrumentation and Controls
Electrical Consumables
Packaged Control Panels

TOWER

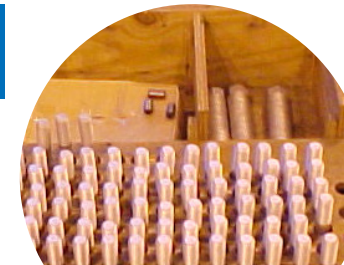

Large Diameter Structural Hardware
Tower Internal Kits:
Platforms and Mounting Brackets
Electrical Cable Tray
Power Cables and Control Cables
Light Fixtures and Receptacle Kits
Climbing Ladder
Hoist and Elevators

BLADES

Blade Bolts and Barrel Nuts
Lightning Protection Systems
Receptors, Cables, Connectors
Blade Lifting Calibration

OTHERS

Consumable Kits
Site Installation Kits
Hardware for Mounting
Foundation Bolts
Heat Transfer Fluids
Lubrication
Filters
Custom Coated Hardware
Welded Bosses

Hub Hardware Kit

Tower Bolt Kit

Machining & Fabrication

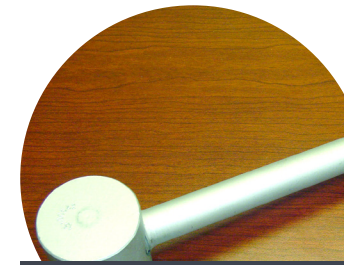

B & C Class Products in Kanban

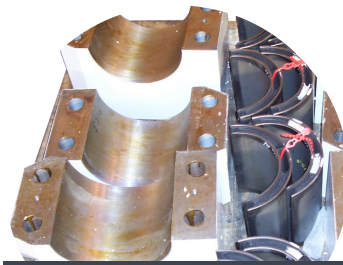

Electricals, Cables & Harnesses

A Class Repair & Retrofit

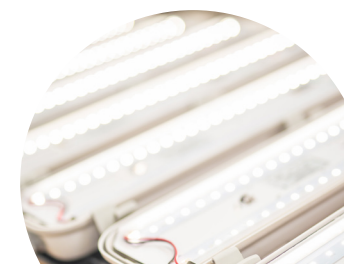

Blade Hardware

Steel Fabrications

Inspection & Calibration

Light Fixtures

Tower Internals
